

GAS DETECTION SERVICES

Calibration and servicing of gas detection equipment is an essential and fundamental part of any safety assured operation. Without regular maintenance and calibration the performance of equipment cannot be relied upon, this uncertainty impacts directly on individuals and safe systems of work.

SGS United Kingdom Ltd can offer a complete calibration, maintenance and hire of personal and area gas detectors as well as servicing fixed system installations. Flammable, toxic and oxygen sensing equipment can be catered for. Calibrations are carried out using high stability reference gases that are certified via gravimetric analytical techniques thus ensuring calibration accuracy.

Through its Gas Detection, Engineering and Instrumentation services, SGS United Kingdom Ltd exists to help your business excel.

Calibration and servicing is an essential and fundamental part of any safety and quality assured system. Without regular maintenance and calibration the performance of gas detection equipment cannot be relied upon, this uncertainty impacts directly on the assurance of safety for individuals and safe systems of work. Furthermore, the calibration process itself must meet certain criteria and traceability if it is to be of benefit.

With manufacture approved service and calibration facilities, SGS United Kingdom Ltd has developed a network of services for satisfying the most exacting of standards. Utilising sophisticated equipment, with trained and competent personnel, you can be certain of the highest level of service you are receiving.

SGS United Kingdom Ltd can offer a host of hire solutions, from short term simple situations to long term leasing of equipment to meet your entire gas detection requirements. A service can be tailored to meet the most demanding of requirements.

By choosing SGS United Kingdom Ltd for your gas detection maintenance, calibration and hire provider, you gain access to an unrivalled network of expertise and skills. These skills are brought together, with appropriate reference equipment, to ensure the quality of your gas detection calibration.

The increasing requirements of today's stringent working legislation to reduce personnel exposure to risk, means that considerable emphasis is placed on the utilisation of reliable gas detection equipment. The services provided by SGS United Kingdom Ltd facilitates the smooth progression of maintenance operations that may not proceed without reliable safety monitoring equipment

With manufacture approved service and calibration facilities, SGS United Kingdom Ltd have developed a service capable of calibrating and maintaining a wide range of equipment both at our laboratories or at our clients premises. Calibration and maintenance needs can be tailored to specifically meet the most demanding requirements by our fully trained and competent network of technicians.

SGS United Kingdom Ltd can offer complimentary services to the routine calibration and maintenance of your gas detection equipment. A recall and scheduling service can be provided and there are a range of "on site" preventative maintenance regimes available on a weekly or monthly basis.

Fast turnaround of equipment can be assured by use of our automated calibration and certification systems. Records are stored electronically, and available via a web based reporting option, thus enabling the facility to provide statistics and historical information.

SGS United Kingdom Ltd have the relevant capabilities and experience to offer a full management service. For instance we can take ownership of the gas detection element of a site outage, shutdown, project or changeover and offer varying levels of management capability.

Our large gas detector hire fleet is capable of catering for the smallest job through to major site works requiring considerable quantities of units. All units are hired with the assured support should any problems arise.

SGS United Kingdom Ltd laboratories are independently accredited by UKAS as a Calibration Laboratory to ISO 17025. SGS United Kingdom Ltd also operate their own Quality System to ISO 9001:2000 and a Management Improvement Programme. By choosing SGS United Kingdom Ltd for your gas detection requirements you are assured of the highest quality service needed by your business.
